

AMELIA B. FINARET, PhD RD LDN**Curriculum Vitae****February 2025**

Allegheny College
Associate Professor
Department of Global Health
Department of Business and Economics
afinaret@allegheny.edu
[Google Scholar Profile](#)

Titusville Area Hospital
Critical Access Hospital
Clinical Dietitian

Titusville, PA
afinaret@mmchs.org

EDUCATION

Ph.D. Friedman School of Nutrition Science and Policy, Tufts University

M.S. Agricultural Economics, Iowa State University

B.S. Applied Mathematics and Statistics, Stony Brook University

CREDENTIALS

RD (Registered Dietitian), Commission on Dietetic Registration

LDN (Licensed Dietitian Nutritionist), State of Pennsylvania

PROFESSIONAL EMPLOYMENT

2022 Associate Professor of Global Health and Economics, Allegheny College

2022 Clinical Dietitian, Titusville Area Hospital, Titusville, PA, USA

2022 Lecturer, Global Agriculture and Food Systems, Royal (Dick) School of Veterinary Studies, University of Edinburgh, Scotland

2015 Assistant Professor of Global Health, Allegheny College

2010 Research Associate, Center for Agricultural and Rural Development, Iowa State University

OPEN ACCESS TEXTBOOK

2024 Food Economics: Agriculture, Nutrition, and Health
(*Palgrave-McMillan*)

Food Economics provides an accessible introduction to the market systems and government policies that link natural resources and the environment to our food supply, nutrition, and health. The book is a self-contained text to support one-semester courses on the economics of food, and to serve a broader professional audience engaged in agriculture and nutrition and can be understood with no prior training in economics or nutrition. The book's comprehensive scope allows readers with a background in one aspect of the food system, such as agriculture, health sciences, or consumer behavior, to see its links to the other elements of the food system such as transportation, processing, and government policy.

WORKING PAPERS

- 2025 Finaret, A.B. and Masters, W.A. *Food economics: Teaching for the future of agriculture, nutrition, and health*. Selected Paper prepared for the Agricultural and Applied Economics Association at ASSA Annual Meeting 2025. Available here.

AWARDS AND HONORS

- 2023 Honorary Lecturer, Global Agriculture and Food Systems, Royal (Dick) School of Veterinary Studies, University of Edinburgh, Scotland
- 2022 Commission on Dietetic Registration Faculty Fellowship Award
- 2015 Emerging Leaders in Nutrition Science Poster Competition, American Society for Nutrition
- 2009 Graduate College Teaching Excellence Award, Department of Economics, Iowa State University

GRANTS, FELLOWSHIPS & CONSULTANCIES

- 2024 Co-I for National Institute for Health and Care Research (NIHR) Policy Research Programme, *Nutrition in the early years. Health effects of diets in young children* (2.5 years, £807,000).
- 2023 PI for Data Driven Innovation (DDI) Small Grants Call, University of Edinburgh. “Addressing measurement error in dietary intake assessment.” (£8,700).
- 2021 Consultant for “Evidence-based policymaking for applied economists,” to develop a workshop with a conference grant from the National Institute for Food and Agriculture (\$32,192).
- 2020 Co-PI from the Franklin H. and Ruth L. Wells Foundation to fund an applied health data analysis course and research experience for undergraduates (\$25,863)
- 2019 Co-PI for grant from Orris C. Hirtzel and Beatrice Dewey Hirtzel Memorial Foundation to fund an undergraduate *Health Informatics Computer Lab* at Allegheny College (\$110,000).
- 2018 Consultant for The World Bank, Poverty, Equity, and Global Practice for Nutrition smoothing: Synthesis of research on vulnerability and resilience to early-life shocks (\$15,480).

- 2014 Predoctoral Fellowship Award, American Society for Nutrition (\$5,000).
- 2013 U.S. Borlaug Fellowship in Global Food Security, Purdue University and U.S. Agency for International Development (USAID), Kinshasa, Democratic Republic of the Congo (\$27,000).

INVITED TALKS

- 2024 Eckstein, L.E., **Finaret, A.B.**, and Whitenack, L.B. *Embracing a Pedagogy of Failure*. Interactive Workshop for the Liberal Arts and Sciences Collaborative, Open Society University Network.
- 2024 Eckstein, L.E., **Finaret, A.B.**, and Whitenack, L.B. *WTF: Way(s) to Fail*. Interactive Online Workshop for the Great Lakes Colleges Association (GLCA)/Global Liberal Arts Alliance (GLAA) Consortium for Teaching and Learning.
- 2023 **Finaret, A.B.** *Food Economics for Nutrition Professionals*. Presented at the Academy of Nutrition and Dietetics (ACEND) Lifelong Learning Webinar Series. Approved for Continuing Education Credit for Registered Dietitians.
- 2021 **Finaret, A.B.** *Data quality: Considerations when using linked data*. Presented at: “Evidence-Based Policymaking for Applied Economists”, AAEA Post-Conference Workshop [virtual oral presentation].
- 2021 **Finaret, A.B.** and Masters, W.A. *Leveraging the New Economics of Nutrition for Improved Patient Care and Public Health*. Presented at: Continuing Opportunities for Professional Education (COPE) at the M. Louise Fitzpatrick College of Nursing at Villanova University [virtual oral presentation].
- 2021 Masters, W.A., **Finaret, A.B.**, Block, S.A. *The multiple burdens of malnutrition: Dietary transition and food system transformation in economic development*. Presented at “What Matters in Agricultural Economics? Setting the Agenda for the Handbook of Agricultural Economics,” AAEA Post Conference Workshop [virtual oral presentation].

CONFERENCE ACTIVITY

- 2025 Finaret, A.B. and Masters, W.A. *Using the Economics of Food to Reach Diverse Students in the Age of Disengagement*. Part of paper session: [*Food Economics: Reaching New Audiences in Public Health, Climate Resilience, and Development*](#). AAEA at the Allied Social Sciences Association, San Francisco, CA.

- 2024 **Finaret, A.B.** Discussant for Agricultural and Applied Economics Association (AAEA) Symposium. *New Developments in Assessing Global Food Security*, New Orleans, Louisiana.
- 2024 **Finaret, A.B.** *Teaching food economics in the liberal arts for students from other fields.* Organized Symposium. Agricultural and Applied Economics Association Annual Meeting (AAEA), New Orleans, Louisiana.
- 2020 **Finaret, A.B.** and W.A. Masters. *Can shorter mothers have taller children? Nutritional mobility, health equity, and the intergenerational transmission of relative height.* Agricultural and Applied Economics Association (AAEA) Annual Meeting, Kansas City, KS [virtual oral presentation].
- 2019 Kirschner, S. and **Finaret, A.B.** *Conflict and Child Health: Untangling the Mechanisms.* Peace Science Society International, Kansas State University, Manhattan, KS.
- 2019 Eckstein, L., **Finaret, A.B.**, Whitenack, L. *Teaching the Inevitable: Embracing Failure in Pedagogy.* Conference on Teaching and Learning in Higher Education. La Roche University, Pittsburgh, PA.
- 2019 **Finaret, A.**, Alemu, R., Masters, W.A. Sex-specific Sibling Rivalry in Child Health: Evidence from over 190,000 Twins. *Current Developments in Nutrition* 3(S1): P18-098-19. *American Society for Nutrition*, Baltimore, MD.
- 2018 **Finaret, A.B.**, Marzouca, T.M. *, Masters, W.A. Equality of opportunity in child nutrition: Evidence from rank-order mobility of 701,255 mother-child pairs in 81 countries, 1985-2016. Liberal Arts Colleges Development Conference (LAC-DEV), Middlebury College, Middlebury, VT.
- 2017 **Darrouzet-Nardi, A.F.**, Boehm, R., Stabley, S.* Should the definition of food deserts incorporate a seasonal component? Experimental Biology: American Society for Nutrition, Chicago, IL.

TEACHING EXPERIENCE

Allegheny College, Sole Instructor

2025-2025 **Foundations of Human Nutrition**

An introduction to the science of human nutrition. Students explore nutrients, their actions and interactions in the body, their absorption and excretion, and their relation to health and disease. Students investigate nutrient requirements and how they differ depending on age, sex, life-stage, physical activity, and disease states. Topics include macronutrients, micronutrients, energy metabolism, nutrition through the life cycle, prevention of chronic disease, and food safety. Students will analyze dietary adequacy and quality, explore data about population dietary patterns, and use case studies to explore both clinical and public health nutrition topics. *A 200-level introductory course, designed for RN students.*

2015-2025 **Global Health and Nutrition**

An evaluation of selected global health challenges in nutrition, with particular focus on maternal and child health. Students explore the bio-social origins of various nutritional concerns, including macro- and micro-nutrient deficiencies, food insecurity, food safety, and disparities in heights and weights. Students analyze how nutritional status develops within specific ecological and cultural contexts and examine the ethical and health implications of nutritional disparities. Critical thinking about nutrition science and policy is a key component of this course, as students will examine the evidence base for nutrition interventions and evaluate the effectiveness of various policies to improve nutrition and health outcomes globally. *A 400-level capstone course, seminar format.*

2015-2025 **Economics of Food and Agriculture**

A study of the economics methods used for food policy analysis. Students apply economics tools to major food and nutrition policy problems around the world. Students explore food production and consumption behavior, social welfare changes, international trade, market failures, and government policies. Through a combination of lectures and seminars, students gain analytical methods and familiarity with data to explain and predict outcomes of the food economy, including trends in poverty,

inequality, employment, and economic growth. *A 300-level elective course, combination of lecture and seminar.*

2021-2025 **Global Health Data and Visualization**

An exploration of publicly available quantitative data related to global health and development from individuals, families, and countries around the world. Students learn how to find, organize, and visualize publicly available data, as well as practice database management, merging, documentation, and visualization with emphases on data equity and on understanding the underlying processes by which data are generated by various agencies and organizations. Students investigate the benefits and drawbacks of using publicly available data and gain skills to prepare for independent data analysis. *A 200-level elective course, flipped classroom.*

2015-2025 **Introduction to Global Health Studies**

An examination of global health and development issues including region-specific challenges to the wellbeing of populations and the environment. Students explore the collaborative, interdisciplinary approach required to address complex health challenges worldwide. *100-level survey introductory course, lecture format.*

2016-2025 **Topics and Approaches in Global Health Studies**

This course will introduce you to the research methods and modes of communication used in the field of global health. We will use case studies to investigate different approaches to identify, define, analyze, and respond to global health issues. We will read primary and secondary research, interpret data, evaluate tools for communicating effectively to different audiences, and explore various research methods. Ethical, cultural, and interdisciplinary dimensions of global health research and work will be emphasized throughout the course. *A 200-level writing and speaking course, flipped classroom seminar format.*

2018-2025 **Global Health Challenges**

A study of changing epidemiological improvements in less developed regions and an evaluation of interventions to reduce disease and improve human health. Case studies explore culturally specific approaches and strategies. Students examine economic, social, political, and ecological foundations of disease and evaluate whether current strategies and best practices used elsewhere can be applied to these cases. We also review literature that evaluates successes in comparable settings and then research and propose strategies using evidence-based approaches. *A 500-level required research course, flipped classroom seminar format.*

University of Edinburgh, Course Organizer and Lecturer
